Revol Wireless Expands Network Coverage into Newark, Ohio.

Cleveland, Ohio (November, 2008) – Revol Wireless, a leading regional wireless communications provider recently expanded its wireless service into Newark, Ohio, further enhancing its Columbus network. This value-driven, wireless provider offers unlimited anytime minutes, text messaging and other unlimited wireless services for a simple flat monthly rate without a contract.

As a regional wireless provider, Revol Wireless is focused on providing exceptional network quality and the simplicity of a predictable monthly rate to areas of Ohio, Indiana, and Pennsylvania, with extended coverage options in Michigan, Kentucky, and New York.

Upgrading the Revol Wireless network in Newark enhances the customer experience and delivers the reliable service Revol subscribers have to come to expect. Eight new cell sites were brought on the air in the Columbus market to expand service and provide coverage to Newark, Heath, Granville and Union Station, as well as improved coverage along I-70, SR 16, US 40 and SR 161 within greater Columbus.

“Our high quality, all digital wireless network provides the platform to offer truly unlimited service for a flat monthly rate,” said Linda Marshall, COO of Revol Wireless. “The expansion into Newark will enhance our coverage footprint and provide more Columbus residents the ability to experience Revol’s quality and value of unlimited anytime minutes.”

According to Marshall, the network enhancement is essential to Revol’s success. “Since our service does not require a contract, our customers have the option to re-choose our service every month when they pay their monthly bill – that’s why we have to earn their business everyday with exceptional service quality,” Marshall adds. “We pride ourselves on being easy to do business with and eager to exceed our customers’ expectations – we want them to be delighted with their wireless provider.”
